Experience

Product Design Intern at Cardtree

July 2025 - November 2025

Designed and shipped multiple new widgets, including the AI Twin experience for both users and visitors, while refining legacy components to create a cohesive and scalable product. I built a unified brand identity, standardized interaction patterns, and strengthened design-dev collaboration by overseeing implementation quality, ensuring the product was polished and market-ready for launch.

Freelance UX Designer & Framer Developer

Jun 2024 - Present

Projects

Digital Refresh for MyTags - Client Work

April - July 2025

Led the end-to-end redesign of MyTags' mobile application and the landing page, transforming the user experience and interface for market readiness. Conducted user research, usability testing, and iterative prototyping, resulting in an intuitive app.
